MANUFACTURING COMPANY'S IMPROVED SEWING MACHINES. Manufactured at Watertown, Conn.,
Office and Warercoms at 343 Broadway, N. Y.
HESE Machines have been in successful opera

tion, in the hands of manufacturers and famiies for the past two years, and in every case have given universal satisfaction. The proprietors are now prepared to offer them to the public, with that increased confidence in their merits, which the united testimony of their nume

rous customers has strengthened and confirmed. These machine: are entirely different from any other, the principles on which they are made being exclusively our own. Among the advantages of this Machine over any others are the following.

1. The simplicity of its construction, and the ease with which it can be kept in the most perfect order.

2. The perfect manner with which the operator is enabled to stitch and sew the various kinds of work, from the finest linen to the coarsest cloths. 3. It particularly excels in the rapidity with which work can be executed, and in that respect it has no

4. The little power required to ipropel them, enabling even those of the most delicate constitution to use them without injury to their health. We are now manufacturing a larger-sized machine more particularly sdapted to the sewing of leather, canvas bags, and the heavier kinds of cloths. An examination of our Machines is respectfully O. C. F. SALOMON'S IMPROVEMENT IN . BRICK MAKING, Patented April 25, 1854. By this method of making brick the various wellknown facilities and advantages of the ordinary manual process are combined with those of the machine or press system, while many disadvantages peculiar to the action generally of the latter are avoid ed; the bricks are maje rapidly and dried and pre-pared for the kiln upon the bed on which they are moulded with but little delay and without the labor of removal or exposure to defacement to which they

are subjected in the ordinary way. In the foregoing description of my improvement reference only has been made to the plain or ordins-ry building brick, but it is obvious that by a suitable construction and arrangement of the platen and

mould box it is equally capable of manufacturing tile, hollow cornice, or any of the other well known forms of brick.

Patent rights for sale. Address J. C. F. SALOVON, Bladensburg, Prince George co, Md. N. B.—Two hundred well pressed bricks can be made in one minute, without the labor of removal.

My fears are founded upon a knowledge of human nature and experience as to the apparent success of all evil designs. Error once successfully engrafted upon the body politic, is like a cancer in the human system; the more it is liberty, from foreign lands, without dropping tampered with, the more it seems to propate a tear upon their sanctified graves. I would chanics and laborers, and office helders, all gate its malignant fibres through the system until it destroy it. The only successful mode of treatment is cauterism and the knife. Hence the treatment I recommend is that there shall republican and intolerant sentiments. That they shall not be encouraged by bounty upon their efforts against society, against human right, against Christianity. I am a native born citizen, and no Catholic. I have the most exalted opinion, however, of Catholicity, and I am not yet without hope that faith may come. There is as much, doubtless, of the true principles of christianity in the Catholic system, as any other practised upon earth. At the same time I here say that I am opposed to any connection between Church and State; and there is no Catholic in this land who desires it. I would not trust any sectarian power in the administration of government. Hence the reason that I have hastily written this long communication with the view to assist in putting down Know-Nothingism, which has taken the incipient steps to bring about such a result in this country. Catholicity and Protestantism have both had their day in the administration. of political power in the old world; both have caused human blood to pour in torrents. But the christianity of the present day, as judged by its practice, as established by the new order of christians, the Nnow-Nothings, have none of these virtues. They are for persecuting the Catholies, an order of christians known for fifteen hundred years before Protestantism, which they advocate, had an existence on earth. An order of christians which preserved in their purity the Scriptures even through the dark ages of the world, when it was benighted, and the order of Know-Nothingism had its full sway, should not be proscribed by modern christianity, whose love is limited to a

particular circle. The best basis for religion is at last a conformity to those laws instituted by the Maker works. There is no violation of the physical goral law. A non-conformity to these, is the ource of all the misery and unhappiness in he world. It is idle to suppose that these laws can be disregarded with impunity. The violation of either, once committed, brings its consequent effects. These effects are unavoidable, and are incurable, unless the Creator, in his mercy, intervene his power.
